(Dated: May 23, 2016)

In this Supplemental Material, we list the angular dependence of the major frequencies, which was obtained in our rotation study, in Table S1 for the interest of the reader.

Angle $\phi$ (degrees)	Frequencies (T)				
20	64	229	-	-	1501
25	66	232	-	-	1482
30	64	240	-	-	1412
35	75	260	-	664	1403
40	93	265	421	-	1401
45	93	311	415	647	1353
50	71	249	-	-	1397
55	49	246	-	-	1423

TABLE S1. Table of angular dependence of major frequencies.  $\phi$  denotes the angle between the applied field and the  $a$ -axis, with an overall uncertainty in the orientation of the crystal of  $\sim 5^\circ$ .
